Index to Subjects—Volume 5, 1981

- Acanthamoeba*, regulation of fatty acid unsaturation in encysting cells of, 129
Acanthamoeba castellanii, 129
 Acetic acid, formation of, 255
Acetobacterium woodii, phylogenetic analysis, 35
 Achleplasmas, 101, 367, 371
 lack of genetic relatedness among animal and plant, 367
Achleplasma laidlawii, 101
 Actinomycetes, phylogeny, 197
 F₁-Adenosine triphosphatase, inhibition by antibodies, 363
 Adenosine triphosphate, 343
 Adenylate energy charge, 343
 Aeration, 223
 Aerobic bacteria, hydrogen-oxidizing, 333
Aeromonas, polynucleotide sequence relatedness, 109
Aeromonas caviae, 109
Aeromonas hydrophila, 109
Aeromonas sobria, 109
Alcaligenes sp., nitrite and nitrate synthesis from pyruvic-oxime by, 379
 Anaerobes, thermophilic, 255
Anaplasma marginale devoid of host cell antigens, preparation of, 95
 Antibiotics, beta-lactam: effect on thymidine incorporation, 375
 Antibiotics, polyene, 139, 187
 resistance of *Candida albicans* to, 139
 Antibodies
 F₁-adenosine triphosphatase, effect on, 363
 chlamydial, 157
 Antigenicity, *Anaplasma*, 95
 Antigens, preparation of *Anaplasma marginale* free of, 95
 Antimicrobial agents, 343
 Antimicrobial resistance, Enterobacteriaceae, 143
 Appendaged bacteria, 1, 241
 Aspartate transport, 179
 Bacterial F₁-adenosine triphosphatase, 363
 Bactericidal extract from *Brucella abortus*, 7
Bacteroides fragilis, cellular localization of glycoside hydrolases in, 13
Bacillus subtilis
 manganese-stimulated exonuclease isolated from, 23
 restricted turnover of the cell wall of, 19
 Bacteriophage
 φ6 phytopathogenic pseudomonads, 247
 φX 174, in *Escherichia coli*, 45
 yellow-pigmented enterobacteria, 61
Beneckea harveyi, 299
 Beta-lactam antibiotics: effect on thymidine incorporation, 375
 Beta-lactamase, 51, 219, 227
 production in *Staphylococcus aureus*, 227
 TEM, 219
 Bioleaching, 115
 Bioluminescence, bacterial, induction of system on solid medium, 299
 Biosynthesis of hydrogen cyanide in *Pseudomonas aeruginosa*, 223
Blastocaulis-Planctomyces group
 life cycle of a morphotype IV organism, 1
 Planctomyces crassus, morphotype Ib, 241
Brucella abortus, properties of a bactericidal extract from, 7
 Budding bacteria, 1, 241
 2-Butynedioic acid, catabolic product of which acts as a precursor of nicotinamide adenine dinucleotide, 279
 Calcium peroxide, alleviation of microbial inhibition of seed germination by, 27
Candida albicans
 alteration of ergosterol content and chitin synthase activity in, 187
 resistance to polyene antibiotics, 139
 Carbon dioxide fixation, 255
 Cardiolipin, 273
 Catalytically inactive isocitrate dehydrogenase, 353
 Cell wall of *Bacillus subtilis*, restricted turnover of, 19
 Centrifugation, renografin density gradient, for purification of phony peach bacterium from plant extracts, 295
 Cereal seedling establishment, alleviation of microbial inhibition of, 27
 Chemolithotrophic growth, 255
 Chitin synthase, 187
Chlamydia, differentiation of hemagglutinins in tissue infected with, 157
Chlamydia psittaci, 157
Chlamydia trachomatis, 105, 157
 infection of HeLa-229 cells with, 105
 Chloramphenicol acetyltransferase, new variant from *Pseudomonas aeruginosa*, 261
 Chlorhexadine, 343
 Cholera, 123
Citrobacter intermedius C3, isolation and characterization of phages infecting, 153
Clostridium barkeri, phylogenetic analysis, 35
Clostridium butyricum
 penicillinase activity in, 251
 phylogenetic analysis, 35
Clostridium lituseburense, phylogenetic analysis, 35
Clostridium thermoaceticum, 255
Clostridium thermoautotrophicum sp. nov., 255
 Coliform survival, 289
 Colonies, spreading of, 235
 Colonization factor antigens, *Escherichia coli*, 67
 Continuous culture, streptococci, 175
 Conversion, avirulent to virulent in *Legionella pneumophila*, 31
 Corn stunt spiroplasma
 DNA hybridization with *Spiroplasma citri*, 83
 use of enzyme-linked immunosorbent assay to detect, 101
 Crateriform structures, 1, 241
Cryptococcus neoformans, 133
 Cyanide biosynthesis by *Pseudomonas aeruginosa*, 223
 Cysts, *Acanthamoeba*, 129
 Cytochrome c, 267
Cytophaga johnsonae
 auxotrophic mutants of, 235
 nutritional requirements of, 235
 Dental plaque, 343
 Deoxyribonucleic acid, Shope papillomavirus, 349
 Deoxyribonucleic acid base composition of spiroplasmas, 83
 Deoxyribonucleic acid hybridization: *Spiroplasma citri* and corn stunt spiroplasma, 83
 Deoxyribonucleic acid relatedness motile aeromonads, 109
Sporidiobolus, 73
 Electron microscopy, *Anaplasma*, 95
 eltor biotype of *Vibrio cholerae*, 123
 Encephalitis, eastern and western equine, 311
 Encephalomyelitis, Venezuelan equine, 311
 Endonuclease, map for Shope papillomavirus DNA, 349
Enterobacter cloacae, 61
Enterobacter sakazakii, 61
 Enterobacteriaceae, incidence of antimicrobial resistance among strains isolated in Riyadh, 143
 Enterotoxin, production by *Yersinia enterocolitica* and *Y. enterocolitica*-like bacteria, 119

- Environments, metals and *Thiobacillus ferrooxidans*, 115
- Enzyme-linked immunosorbent assay, corn stunt spiroplasma in plants and insects detected with, 101
- Enzymes, membrane-bound, 333
- Equine encephalitis, 311
- Ergosterol
mutants, 187
synthesis by *Candida albicans*, 139
- Erwinia herbicola*, 61
- Erwinia raphanidis*, 61
- Escherichia coli*, 39, 45, 143, 147, 179, 279, 353, 375
beta-oxidation-mediated resistance to inhibition by long-chain fatty acids, 147
hydrophobic adsorptive and hemagglutinating properties of, 67
identification of spheroplasts by fluorescent-antibody staining, 39
infected with bacteriophage ϕ X 174: alterations in the cytoplasmic and outer membranes, 45
isocitrate dehydrogenase from, 353
multiple dicarboxylic amino acid transport systems with different specificities in, 179
- Eubacterium limosum*, phylogenetic analysis, 35
- Eubacterium tenue*, phylogenetic analysis, 35
- Exonuclease, manganese-stimulated: isolated from *Bacillus subtilis*, 23
- Fatty acids, 129, 147, 231
regulation of unsaturation and chain length in *Acanthamoeba*, 129
resistance of *Escherichia coli* to inhibition by, 147
- Fermentation, homoacetate, 255
- Fibroblasts, cultured human embryonic lung, 31
- Filobasidiella bacillispora*, 133
- Filobasidiella neoformans*, sexual compatibility between serotypes of, 133
- Fluorescent-antibody staining technique, identification of *Escherichia coli* spheroplasts by using, 39
- Food poisoning by *Yersinia enterocolitica* and *Y. enterocolitica*-like bacteria, 119
- Freezing nucleus, 213
- Frost damage by ice-nucleating bacteria, 213
- Frost sensitivity, 213
- Genetic map, restriction endonuclease, of Shope papillomavirus, 349
- Genetic transfer, *Staphylococcus aureus*, 227
- Gliding bacteria, 169
- Glucitol, presence in group-specific polysaccharide of group B *Streptococcus*, 283
- Glutamate transport, 179
- Glutamine synthetase I, 329
- Glycerol kinase, 191
- Glycerol-3-phosphate dehydrogenase, 191
- Glycoside hydrolases, cellular localization of in *Bacteroides fragilis*, 13
- Haemaphysalis leporispalustris* (Acari: Ixodidae), 339
- HeLa-229 cells, infection by *Chlamydia trachomatis*, 105
- Hemagglutinins, chlamydial, 157
- Hemagglutination, 67
- Hemolysin, from *Treponema hyodysenteriae*, biological activity of, 91
- Hemolysins, of treponemes, comparative study of, 87
- Heterothallism, in *Sporidiobolus* Nyland, 77
- Hydrogen cyanide, 223
- Hydrogenase, 333
- Hydrogen-oxidizing aerobic bacteria, 333
- Hydrophobic activity, 67
- Hydroxylamine, 379
- Hyperimmune serum, 307
- Ice-nucleating bacteria as causative agents of frost damage, 213
- Immune transfer, passive, 307
- Immunity, cell-mediated, 307
- Inhibition
hemagglutination in studies of *Chlamydia*-infected tissues, 157
microbial, of seedling establishment, 27
- Intestine, 91
- Iron encrustation, 241
- Iron-oxidizing bacteria, 115
- Isocitrate dehydrogenase, from *Escherichia coli*, 353
- Isoleucine, 231
- Klebsiella*, 143, 289
colonization of radish plants, 289
- Legionella pneumophila*, avirulent to virulent conversion through passage in cultured human embryonic lung fibroblasts, 31
- Levinea malonatica*, 61
- Life cycle, *Blastocaulis-Planctomyces* group, 1
- Lipids, 129, 139, 231, 273
composition of, *Candida*, 139
microviscosity and phase properties, *Acanthamoeba*, 129
synthesis, 273
turnover, 273
- Localization of glycoside hydrolases in *Bacteroides fragilis*, 13
- Luminescence, 299
- Lymph nodes, mesenteric, 307
- Lymphogranuloma venereum, 105
- Manganese encrustation, 241
- Mecillinam induction of ovoid form in *Salmonella typhimurium*, 207
- Megasphaera elsdenii*, survival during starvation, 51
- Membranes
bacteriophage-infected *Escherichia coli*, 45
microsomal, from *Acanthamoeba*, 129
model bilayer, *Candida*, 139
potential, mycoplasmas, 371
- Mercury, volatilization of by *Thiobacillus ferrooxidans*, 115
- Metals, transformation by *Thiobacillus ferrooxidans*, 115
- Micrococcus lysodeikticus*, immunochemistry of membrane F_1 -ATPase, 363
- Mitogens, 91
- Morphology
Blastocaulis-Planctomyces group, 1
effects on by induced autolysis of *Saccharomyces cerevisiae*, 163
ovoid-induced in *Salmonella typhimurium*, 207
- Motility, gliding, 235
- Mutants, auxotrophic, of *Cytophaga johnsonae*, 235
- Mycoplasma membranes, proton gradient across, 371
- Mycoplasma gallisepticum*, 101
- Nalidixic acid, resistance to, 353
- Nuclease, manganese-stimulated: isolated from *Bacillus subtilis*, 23
- Neuraminidase
from *Pasteurella haemolytica*, 203
production by streptococci affected by oxygen, 175
- Nicotinamide adenine dinucleotide, catabolic product of 2-butyne dioic acid which acts as a precursor of, 279
- Nitrate synthesis, 379
- Nitrification, 379
- Nitrite synthesis, 379
- Nitrobacter agilis*, nitrite and oxidoreductase systems, 267
- Nucleic acid hybridization, acholeplasmas, 367
- Numerical analysis of *Vibrio cholerae* biotypes from Australia, 123
- Octenidine, 343
- β -Oxidation: fatty acid inhibition of *Escherichia coli*, 147
- Oxidation
nitrite, in *Nitrobacter agilis*, 267
periodate, 7
- Oxidoreductases, 267

- Oxygen, 175, 223
concentration: effects on neuraminidase production by streptococci, 175
- Papovaviridae, 349
- Papillomavirus
bovine, 349
Shope, 349
- Pasteurella haemolytica*, neuraminidase from, 203
- Penicillinase activity in *Clostridium butyricum*, 251
- Peptidoglycan, 19, 45
- Periodate oxidation, 7
- Phage, 45, 61, 153, 247, 357
Citrobacter intermedius-specific, 153
66, 247
spiroplasmavirus, 357
- Phony peach bacterium, 295
- Phosphate, kinetic limitations on trapping of nascent, 57
- Phosphatidylethanolamine, 273
- Phospholipids
inositol-containing, 273
metabolism of in *Streptomyces griseus*, 273
- Phylogenetic analysis
Acetobacter woodii, 35
Actinomycetes and related organisms, 197
Butyribacterium rettgeri, 35
Clostridium barkeri, 35
Clostridium lituseburense, 35
Eubacterium limosum, 35
Eubacterium tenue, 35
- Pierce's disease bacterium, 295
- Pili, 1, 67
Escherichia coli, 67
Pseudomonas aeruginosa, 67
- Planctomyces, 1, 241
- Planctomyces crassus*, metallic encrustations and other features of, 241
- Plants, isolation of *Serratia* species from, 317
- Plasmids
P1, 323
resistance, factors affecting increase during hospitalization, 219
- Plum leaf scald bacterium, 295
- Polyene antibiotics, resistance to, 139, 187
- Polynucleotide sequence relatedness, motile aeromonads, 109
- Polysaccharide, group-specific, presence of glucitol in, 283
- Predation by *Saprospira*, 169
- Proteus mirabilis*, 375
- Proton gradient across mycoplasma membrane, 371
- Pseudomonads, phytopathogenic, survey of for a restriction and modification system active on the dsRNA phage $\phi 6$, 247
- Pseudomonas aeruginosa*
influence of aeration on hydrogen biosynthesis by, 223
chloramphenicol acetyltransferase, a new variant from, 261
fatty acids of, grown on media affecting polymyxin susceptibility, 231
glycerol catabolism in wild-type and mutant strains of, 191
use of hemolysin in purifying *Anaplasma marginale*, 95
- Pseudomonas phaseolicola*, 247
- Pseudomonas pseudoflava*, physiological characterization of, 333
- Purification of phony peach bacterium, 295
- Pyruvic-oxime, 379
- Radish plants, colonization by *Klebsiella*, 289
- Refrigeration temperature enterotoxin production by *Yersinia enterocolitica* and *Y. enterocolitica*-like bacteria, 119
- Regulation of glutamine synthetase I from *Rhizobium meliloti*, 329
- Resistance
antimicrobial: enterobacteriaceae, 143
of *Candida albicans* to polyene antibiotics, 139
chloramphenicol, in *Pseudomonas aeruginosa*, 261
metal, 115
- Restriction endonuclease analyses, 323
- Restriction endonuclease map: Shope papillomavirus, 349
- Rheology, effects on by induced autolysis of *Saccharomyces cerevisiae*, 163
- Rhizobium meliloti*, regulation of glutamine synthetase I from, 329
- Ribosomal ribonucleic acid cataloging
Actinomyces bovis, 197
Actinomyces viscosus, 197
Acetobacterium, 35
Bifidobacterium bifidum, 197
Bifidobacterium breve, 197
Clostridium, 35
Dactylosporangium aurantiacum, 197
Eubacterium, 35
Geodermatophilus obscurus, 197
Micromonospora chalybeata, 197
Mycobacterium phlei, 197
Nocardia calcarata, 197
Nocardia cellulans, 197
Nocardia corrallina, 197

Propionibacterium freudenreichii subsp. *freudenreichii*, 197
Streptomyces griseus, 197
Thermoactinomyces vulgaris, 197
- Rickettsia-like bacteria, plant, 295
- Rifampin as selective agent for enumerating and isolating salt-marsh spirochetes, 303
- Rosettes, *Planctomyces crassus*, 241
- Rumen bacteria, 51
- Saccharomyces cerevisiae*
cytochemical localization of yeast acid phosphatase in, 57
induced autolysis of, 163
- Salmonella newport*, 61
- Salmonella typhimurium*, mecillinam-induced ovoid form, 207
- Saprospira*, 169
- Saudi Arabia, antimicrobial resistance among Enterobacteriaceae isolated in, 143
- Seedlings, microbial inhibition of establishment of, 27
- Serotypes, non-O1 of *Vibrio cholerae*, 123
- Serratia* species isolated from plants, 317
- Serratia ficaria*, 317
- "*Serratia grimesii*", 317
- Serratia liquefaciens*, 317
- Serratia marinorubra*, 317
- Serratia marcescens*, 317
- Serratia odorifera*, 317
- Serratia plymuthica*, 317
- Serratia proteamaculans*, 317
- Shope papillomavirus DNA, 349
- Spheroplasts, *Escherichia coli*, identification of by fluorescent-antibody staining, 39
- Spirochetes, 303
- Spiroplasmas, 83, 339, 357
isolated from *Haemaphysalis leporispalustris* (Acari: Ixodidae), 339
- Spiroplasma citri*, 83, 101
DNA hybridization with corn stunt spiroplasma, 83
- Spiroplasmavirus, group 1 isolation, growth, and properties, 357
- Spleen cells, effect of *Treponema hyodysenteriae* hemolysin on, 91
- Spore surface of *Synecephalastrum racemosum*, structure and biochemistry of, 183
- Sporidiobolus johnsonii*, 73, 77
- Sporidiobolus pararoseus* sp. nov., 77
- Sporidiobolus ruinenii*, 77
- Sporidiobolus salmonicolor*, 73
- Sporidiobolus salmonicolor* sp. nov., 77
- Sporobolomyces shibataensis*, 77
- Staphylococcus aureus*, 375
transduction versus transformation of methicillin resistance in, 227
- Starvation, survival of *Megasphaera elsdenii* during, 51
- Sterols, 139, 187
- Streptococci, group B
effects of oxygen concentration on neuraminidase production by, 175
presence of glucitol in group-specific polysaccharide of, 283
- Streptolysin S, 91

- Streptomyces griseus*, turnover of phospholipid moieties in, 273
Strongyloides ratti, transfer of immunity in rats in, 307
 Strongyloidiasis, 307
 Survival of coliforms on plants, 289
 Survival, microbial, 51
 Susceptibility, polymyxin, 231
Syncephalastrum racemosum, structure and biochemistry of spore surface of, 183
- Taxonomy**
Acetobacter woodii, 35
 Actinomycetes, 197
 motile aeromonads, 109
Butyrivacterium rettgeri, 35
Clostridium barkeri, 35
Clostridium lituseburense, 35
Eubacterium limosum, 35
Eubacterium tenue, 35
Serratia, 317
- Sporidiobolus* Nyland, heterothallism in, 77
Sporidiobolus ruinenii, 73
 Temperature, subzero, 213
 Teichoic acid, 19
 Thermophiles, anaerobic, 255
Thiobacillus ferrooxidans, volatilization of mercury by, 115
 Thymidine incorporation, effect of beta-lactam antibiotics on, 375
 Ticks, isolation of spiroplasma from, 339
 Transduction, methicillin resistance in *Staphylococcus aureus*, 227
 Transformation, methicillin resistance in *Staphylococcus aureus*, 227
 Transport dicarboxylic amino acids, *Escherichia coli*, 179
 Treponemes
 biological activity of hemolysins, 91
 comparative study of hemolysins of, 87
Treponema hyodysenteriae
 biological activity of hemolysin from, 91
 hemolysins, 87
Treponema innocens, hemolysins, 87
- Ultrastructure**, 1
- Vibrio cholerae*, phenotypic characterization of isolates from Australia, 123
 Virulence, *Candida*, 139
Vitreoscilla, predation by *Saprospira*, 169
- Warts**, 349
- Yeasts**, 57, 73, 77, 133, 139, 163, 187
 Yeast acid phosphatase, cytochemical localization of, 57
Yersinia enterocolitica, enterotoxin production at refrigeration temperature by, 119
Yersinia enterocolitica-like bacteria, enterotoxin production at refrigeration temperature by, 119
Yersinia kristensenii, 119
